

Exciting Testimonials!!

DYNAMITE® DOES Make a Difference

A BIRTHDAY SURPRISE

This is April, not quite a day old, and her mama, LuLu.

We didn't know the mare was bred (we bought her last fall) and boy was she getting fat! You can imagine our surprise one Friday morning when we spied a new member to our herd! I always wanted a horse for my birthday! The Lord delivered this one a few days early for my special day!

Of course Lulu had been on basic DYNAMITE® since we purchased her, and a few sprays of Release™ helped her engorged bag, so both mom and baby are doing fine.

SMILIN' SALAMANDERS!

This is Fred, our DYNAMITE® Salamander. Fred came to our offices in December to await pick up and delivery by Santa to one of our DYNAMITE® staffers, Kellie Wilson and her family of 3.

Fred was discovered in a pile of dirt that had been delivered to Brad Wilson, DYNAMITE® inhouse, computer wiz. Brad Wilson (no relation to Kellie) and his family raised Fred on crickets, worms and other delectables until it was time for Fred to go to his new home.

Fred's time at the DYNAMITE® offices was spent lounging, soaking, sleeping, lounging, soaking a little more and every now and then entertaining the entire DYNAMITE® staff.

Since his arrival at his new home, Fred has started with small amounts of Exotic Formula™ in his food.

He remains happy and healthy as you can see by the smile on his face!

SHE CAN BREATHE AGAIN

My mother suffers from emphysema, asthma, a whole lot of bronchial issues and a number of other serious health issues. She has long been interested in alternatives to drugs, so it didn't take much convincing to get her to try the DYNAMITE® program.

We decided to put her on Elixir™ to start. About a month later we added Hiscorbodyne®. She had good results so gradually we included Dynamite® and Cell Mend. She never got used to Elixir™ so we switched her to Herbal Green™.

I started to notice that when we spoke on the phone she sounded better, more energetic and not always out of breath. I believe it was about eight months after she began the DYNAMITE® products that she saw her "breathing" doctor. He told her that her lungs were at 90% capacity and to keep doing whatever it was she was doing!

Later she told me that she had gone from using her inhaler every day to just twice a week. Before she started she couldn't walk 20 yards to the mailbox. Not only can she do that but her level of activity has increased and she is feeling better than I have seen her in years.
