

Dyna-Pro™! Dyna-Pro™! Dyna-Pro™!

Submitted by DYNAMITE® Director, Dawn Swinehart, CO

“My comfort level with Dyna-Pro™ is to have six in the cupboard... four to sell and two for myself!”

“Little did I know that our second horse would be such a teacher for us. He came with the name Bandit and we only kept his name because he stole our hearts. He was everything you were not supposed buy in a horse. He cribbed, he bucked, he had low weight, but there was just something about him...

Bandit showed us a thing or two about trust issues, keeping weight on and colic. The first colic, vet comes, does the routine. Next year another colic routine again. Our third year with him and this time he colics three times one summer. The last time was very scary, hard to keep him up shivering in pain. Vet comes and does the routine - Bandit had a small impaction.

I then find out about this product line called DYNAMITE® and I start on the basic program. One of the main points I learned was to stop the alfalfa which is something we had never heard before. It turns out that Bandit cannot tolerate even a leaf of alfalfa. I was so pleased with how it was all explained by my distributor and so impressed with the condition of horses, that I became a distributor myself. I see wonderful results with the program: weight gain, shiny coats, and no colic for two years.

This winter I arrived home to see Bandit at the gate. All of a sudden he is lifting his back leg and looking at it, then he turns and looks at the other side. Oh, no! I try to relax myself and think DYNAMITE®. I give him a pinch of PGR with 6 pumps of Dyna-Pro™. I wasn't quite sure he was colicky but just in case. I do the feeding and Bandit walks away from the hay and lays down. I quickly run to the house and get the syringe, Dyna-Pro™, phone and vet's number, and my husband. We syringe in 20 cc's of Dyna-Pro™ and start walking. For my peace of mind, I give him another 10 cc's of

Dyna-Pro™. After a half an hour he seems fine and is anxious to eat. I never had to call the vet. WOW!!!!

That's why I like 6 bottles on the shelf, you never know even if you are using the products when outside factors enter into the equation and throw things out of balance. I attribute this last episode to a batch of bad hay which is now off our land.”
