

# Perry's Thoroughbred Racing Successfully Strives for Quality!

Submitted by DYNAMITE® Directors, Darrell & Henrietta Perry, CO

*Pictured above: Darrell Perry with Firefree*

**D**YNAMITE® has really enhanced our Thoroughbred racing and breeding horses, making coats shiny, eyes clearer and the horses generally healthier and obviously nutritionally fit.

Darrell says, "All of them are in excellent condition: their hooves are incredible, my racers have more energy and oomph, my broodmares are having large babies easier than ever and the legs on the babies (bone mass) is actually larger and more dense meaning they should be able to avoid so many of the problems that plague young race horses. They put friends' foals to shame." And Henrietta agrees, "I can't believe the difference DYNAMITE® has made; they are shedding their winter coats faster, they are calmer and more relaxed, and just plain look better overall."

All the horses get free choice mountain grass hay and/or pasture, the four **Free Choice Minerals: NTM Salt™, Izmine™, 1:1 & 2:1, plus Dyna-Pro™, TNT™, Pelleted Grain Ration with added H.E.S.™** if they need it, plus **Breeder Pac™** regularly for the broodmares. Our 19 year old broodmare, Silver Glider, had trouble last year with her 11th foal. This year, with her second baby for us and after 2 years on the DYNAMITE® program, she had no problem at all with a very large baby.

A horse we brought in just last week from Pennsylvania had really, really dull eyes and in less than a week, they are as shiny as can be—hopefully her coat will shine up quickly, too, to match all the others. We take these glossy coats so much for granted that it is startling to see a regular coat which now looks so dull.

Of course we also use **Tranquil™, Release™, Wound Balm, Wound Salve, Hiscorbodyne®, Super Stress™**, and almost all of the other products including **Pre Race Pak™**, too, when necessary, but that is another testimonial! Our horses are real special to us, and DYNAMITE® is just as special. We even went away from it for a bit, but came right back because DYNAMITE® works so well. In fact it works better than anything else we have tried and absolutely nothing can compare.

## Photo Album

*Perry's Thoroughbred Racing has been in professional existence since 2001, but has worked with horses in general since 1947. They breed and race fine horses from Kentucky, Colorado and New Mexico. Although they are a small operation (10 horses at the present moment), they strive for quality and as you can see, they get it!*
